Organizing a community needs skills. It is not easy to work with people and keep a community a safe place to belong. In issue of spreading information and learning as a community, organization is very necessary to make it work. Participants can use the training for different kind of communities like gathering to receive information or training, church community, ethnic/tribal, gender, political, cultural, social, national, and so on communities.

This train the trainer training Organizational capability increase is what we offer now.

This component focuses on empowering organizational skills.

It aims to provide participants with the necessary skills to set up, both independently and as a team, working groups with the aim of organizing small-scale information meetings, and to act as bridge builders/key people between African communities, health care providers and so on.

In 4 workshops of 4 hours, the following components will be addressed:

- Team building and working together as a team
- Vision and mission of a community
- Recruiting
- Coordinating a working group
- Developing organizational skills such as planning, location, PR, etc.
- Networking, using social media

There will be Certificate award for those who fulfilled the training

Participants will get support to practice what they learned.

The trainings are given by professionals in this area and will be coordinated by Godian Ejiogu.
